

ICPSCG10

Zakopane - Poland, 16-21 October 2016

10th International Conference of Polish Society for Crystal Growth

FIRST ANNOUNCEMENT

Dear Colleagues,

We are privileged to invite you to participate in the 10th International Conference of Polish Society for Crystal Growth (ICPSCG10). The conference will be held in Zakopane, Poland on October 16-21, 2016. This event will bring together the top scientists in the crystal growth field to discuss recent research and development activities. The conference range will cover all aspects of bulk crystal growth and epitaxial thin film growth, sessions including fundamentals, experimental and industrial growth processes, characterization and applications.

Cutting-edge results concerning graphene, topological isolators, nitrides, metamaterials and biogenic and biomimetic materials will be discussed during this event.

Unique atmosphere of Polish mountains that we are offering will help to make the participation in the conference both comfortable and fruitful.

We look forward to your participation in the ICPSCG10 conference.

*Sincerely,
The Organizing Committee*

TOPICS

Bulk Crystal Growth

Epitaxy

Crystalline
Microstructures

Nanostructures

Biocrystals

Characterization

Novel Materials

Applications

IMPORTANT DATES

MAY 15 Abstract submissions

MAY 30 Notification of abstract acceptance

JUN 15 Early payment ends
